Preface

The past couple of years have been very difficult for all of us, without exception, as we strive to make meaningful contributions to the future of our planet. The pandemic and the expected and realized economic crisis have deeply affected us. As if this weren't enough, Türkiye had to face and manage an additional great disaster: the Kahramanmaraş earthquake on February 6, 2023, which directly impacted an area of approximately 110,000 km² and 13.5 million people. Nevertheless, we found joy in celebrating the 100th anniversary of our country's foundation. We organized or supported the success of ten meetings and social activities, two of which were directly organized by us to celebrate the World Day of Light and World Day of Photonics. We also hosted the 17th NanoTR in İZTECH and fueled our hope in our future with the graduation of our first undergraduate and Ph.D. program students. I have no doubt that each of our graduates will make significant contributions to photonics science and the related industry.

In 2023, the efforts of previous years on internationalization bore fruit; we gained Dr. Michael Barbier as a faculty member, believing in his research plans related to the field of integrated circuits. We also increased the number of our Erasmus agreements to four with the addition of an agreement with Vrije Universiteit Brussel.

Our faculty members and students acted as co-authors in 13 SCI manuscripts, 15 conference papers, 2 book chapters, and the graduate students received support from extraneous sources totaling 165-man months. Our efforts to find extraneous project funds continued. The contributions of our faculty member, Dr. Mehmet Yağmurcukardeş, in science were honored by the METU Mustafa Parlar Foundation Encouragement Award. Additionally, Dr. Mustafa Emrullahoglu and Dr. Mehmet Yağmurcukardeş earned the Best Educator Award of the 2022-2023 Academic Year of İZTECH with the votes of students, bringing two of the three awards in this category to our department.

I am confident that our focus on increasing the quality and quantity of valuable research, following accreditation criteria to enhance the quality of both undergraduate and graduate education, supporting our students on their journey, internationalization efforts, and contributions to society will continue to grow. I would like to express my gratitude to the entire team, department faculty, undergraduate and graduate students, our advisory board for their persistent efforts, and wish a healthy and prosperous 2024.

Announcement

Seeking applicants for faculty positions

The candidates who have a **postdoctoral experience** and a **solid experimental research background** in especially one of the first two main research areas of the department listed below, will be given precedence,

- ✓ **Laser engineering and photonic integrated circuits.**
- ✓ **Biophotonics and mediphotonics**
- ✓ Molecular photonics and photonic devices
- ✓ Quantum photonics and optical spectroscopy

The application package should include a Curriculum Vitae and research and teaching statements that contain future research interests. The shortlisted candidates will be requested to give a seminar summarizing their background and future research plans.

Recruitment continues until the positions are filled.
